TEMACHLOR PRIMER

DESCRIPTION
A chlorinated rubber based primer.

PRODUCT FEATURES AND RECOMMENDED USES
- As a primer or an intermediate coat for chlorinated rubber systems on steel surfaces.
- High film build properties.
- Can be applied at low temperatures.
- Recommended for surfaces exposed to marine or industrial climates and mild chemical attack, such as bridges, cranes, conveyors, harbour equipment and storage tank exteriors.

TECHNICAL DATA

Volume solids 46 ± 2 %.
Density 1.3 kg / litre.
Product codes 008 6721 -2.

<table>
<thead>

<tr>
<td>application range</td>
<td>110 - 175 µm</td>
</tr>
<tr>
<td>typical</td>
<td>130 µm</td>
</tr>
<tr>
<td></td>
<td>9.1 - 5.7 m²/l</td>
</tr>
</tbody>
</table>

Practical coverage depends on the application method, painting conditions and the shape and roughness of the surface to be coated.

<table>
<thead>
<tr>
<th>Drying time</th>
<th>+ 10 °C</th>
<th>+ 23 °C</th>
<th>+ 35 °C</th>

<tr>
<td>Recoatable</td>
<td>4 h</td>
<td>3 h</td>
<td>2 h</td>
</tr>
</tbody>
</table>

Drying and recoating times are related to the film thickness, temperature, the relative humidity of the air and ventilation. NB. Excessive film thickness prolongs the drying time.

Thinner
Thinner 1006.

Cleaning of equipment
Thinner 1006.

Finish
Semi-matt.

Colours
Grey and red.
TEMACHLOR PRIMER

APPLICATION DETAILS

Surface preparation
Remove firm contaminations in order to make the cleaning easier. Remove salts, grease and oil with a suitable detergent. Rinse the surfaces thoroughly with water.

Steel surfaces: Blast clean at least to grade Sa2 (ISO 8501-1).

Primed surfaces: Remove water soluble salts, oil and grease and other contaminants which may harm coating. Let the surfaces dry and remove dust. Touch up damages in the primer coat. (ISO 12944-4).

Primer
TEMACHLOR PRIMER, TEMACHLOR PRIMER AL, TEMAZINC 77 and 99, TEMASIL 90 and TEMAZINC SP 92.
Before overcoating after exposure in contaminated environment, clean the surface thoroughly by fresh water cleaning.

Finish
TEMACHLOR 40 and TEMACRYL AR 50.

Application conditions
All surfaces must be dry. The temperature of the ambient air and surface should not fall below -10 °C / 14 °F during application or drying. Relative humidity should not exceed 85 %. The surface temperature of the steel should remain at least 3 °C / 5 °F above the dew point.

Application
By spray or brush. Mix the paint thoroughly before use. Depending of the application method the paint can be thinned 0-10 %. Airless spray tip size 0.015” - 0.021”, spray angle chosen according to the shape of the object.

VOC
The Volatile Organic Compounds amount to 480 ± 20 g/litre of paint.

HEALTH AND SAFETY
At all times observe precautionary notices on containers. Further information about hazardous influences and protection against those are described in Safety Data Sheet.
A health and safety data sheet is available on request from Tikkurila Coatings OY.

As a general rule, avoid inhalation and skin contact and provide sufficient ventilation. Splashes on skin have to be washed off immediately. Splashes in eyes, rinse with plenty of water and consult a medical centre if the irritation continues.

For professional use only.
